Four [redacted] items which were Coded 25X1A2g
Code Section ~~not~~ were distributed as [redacted]
They were sent only to OCI. OCR received
no copies and hence the document is
not on file in the Library. I have
just received Initial Reading Shuts from
OCI on 25X1A2g [redacted] If Coding
of these [redacted] items is ever reversed
this will be another problem which
will need attention.
